

# Internship at SOPIAD

## Description of the Company

SOPIAD is an independent provider of client-centric ratings that simplify investment decisions for non-professional investors while considering their financial well-being and alignment with personal values. Grounded on years of academic research and guided by seasoned wealth management and academic experts, we assist financial intermediaries in personalizing the investment experience. Within SOPIAD, you'll find a modern startup environment with a pleasant and warm work culture.

## Description of the internship

Provide general support to business analyst team in a manner complimentary to the company.

This will mainly involve:

- Understanding SOPIAD's scoring algorithm.
- Staying updated on the latest ESG (Environmental, Social, and Governance) regulations and sharing summaries/reports highlighting the most significant impacts.
- Working on the content and layout of current and future SOPIAD products.
- Helping to update and improve the entire product life cycle to meet client requirements.

## Your profile

Master 2 student in Financial Engineering or Banking and Asset Management, or similar.

Enthusiast for sustainable investments, especially the incorporation of related criteria into portfolio management. Aware of sustainable regulations developments and their impact on the financial industry.

Proficient oral and written communications skills. Collaborate well in a team environment, play a role in the development of the company while being creative, autonomous and committed.
